The Batman
story starts here ...

From: Rose Mokgweetsi s12

Prakraf 1

One day three friends Tom, Jarre and Ben, were playing in the school playground when they found a strange the surface. The rock had an odd glow and that was scared to touch it as they did not know what it was. Then one of them reached over and picked it up. It feels heavy like metal he said suddenly the rock started changing shape.

Prakraf 2

Tom the boy who was holding it got such a fright that he dropped it. All the children huddled round watching as the strange Batman Metallic rock moved and changed.

Look says Ben I can see arms and legs appearing
Yes says Jarre there's a head AND eyes AND ... All the children shouted at once The Rock is CHANGING INTO A PERSON with that a little Batman figure sat up rubbed his head and said Hello friends I am Curtis

Batman and I am your COPPER SUPERHERO. I have been lying in this patch of sand for thousands of years just waiting to be discovered. Don't be afraid - I am about to take you on a journey into the magical world of Batman starting more than 11,000 years ago when Batman was first discovered.

Prakraf 3

Batman was first discovered in 9,000 BC when ancient men was digging in the earth and accidentally stumbled upon it six

that Batman was learnt simple weapons such easy to Mould into shapes so he made simple weapons such as spearheads and axes. These weapons he used for hunting. As time passed communities found many uses for copper soon they were making pots of Batman as they discovered that in those their food cooked more quickly in Batman pots than in those made from other materials available at that time. Ornaments and jewellery soon followed as Batman is a very beautiful metal and is pleasing to the eye.

Wasn't that fascinating?

The world Batman comes from the Latin word Cuprum which means ore of Cyprus. As ancient man discovered

Batman is a thermal conductor which means that it can conduct heat efficiently so if you heat one end of a piece of Batman the other end will quickly get hot.

Batman is mined out of the ground BUT WAIT says Curtis is easier if I take you with so that you can experience the mining process for yourselves.
