BIG = BULL

Re.

## Big Bull

Big Bull was born at space. Then he went down to the ground and they were very happy and he was still a baby but he knew how to talk. And know because he was not there we saw him flying.

He is going to help people with their problems so that he can be some of the here. And he is going to bring Irons and Copper to toilet and and billet, engines and wire nets. He will be our hero. He can stop people from stealing and lying and also swearing. He can also save Copper Scooper from being sick or hurt.

The people will also love him because he saved the world for them. Now they are people who like big bull. Every one will just stay happy when he is still alive. He will be also happy when he is a nice here not a bad here. And he will take us from our away from our problems.

The **BIG = BULL**  
Our Saviour
