Grade: 5E 1

Katlego michelle pls phalane

Cooper, cooper is a hero who teaches children many things. Cooper helps us it's formed into different things like wires, decoration forks and knives ect. Cooper helps us it is one of the technology developments.

What is Cooper?

Cooper is one of the useful metals which is used for many things. Cooper was discovered long time ago almost like 11,000 years ago in 9,000BC when ancient man was diggin in the earth and accidentally stumbled upon it. Six thousand years later in 3,000BC man had learnt that cooper was easy to mould into shapes so he made weapons such as axes and spearheads these weapons were used for hunting, chopping wood for pier ect ect. As years passed communities found many uses of cooper then started making pots, cups and many different stuff. Now you know what is cooper there are many things to make with cooper. Just read and research more about cooper. Good bey and thank you cooper development.
