My hero's name is Rose Copper  
So my good friends we have learned  
a lot about copper and the  
importance that it plays in our  
lives and our planet

Here are some quick copper

facts for you to remember

□ Copper is a natural element

it is a metal and is

represented by the atomic number

29 Copper is virtually 100% recyclable

people have been using copper

since 9,000 BC

when alloyed with tin bronze is

made when alloyed with zinc brass

is made copper is resistant to ~~the~~

corrosion copper is the only naturally

occurring metal other than gold that

has a distinctive colour. ~~and~~ Copper

conducts electricity reliably and efficiently

most copper in use will remain in

use for over ~~that~~ a half a

century
